## **POWER™ HP™ ATV Belt**

**Designed for low- to mid-range horsepower vehicles up to 350cc including ATVs, golf carts and farm utility vehicles with stock engines and no modifications.**

Dayco POWER™ HP™ ATV belts are designed to provide dependable, smooth performance for leisure, care-free trail riding and yardwork for today's lower horsepower all-terrain vehicles, golf carts and farm utility vehicles. Fast becoming the belt of choice for these applications, the HP ATV belts are manufactured from a specially formulated fiber reinforced polychloroprene rubber compound and aramid cords. They deliver superior strength and dimensional stability for long lasting belt life.

## **POWER™ HPX® ATV Belt**

**Engineered for UTVs and ATVs with mid-to-high horsepower engines between 350cc-600cc with minimal upgrades/modifications.**

From mud holes and rocky trails to hill climbs or desert treks, the POWER™ HPX® ATV belt delivers unparalleled performance and reliability for today's mid-to-high horsepower UTVs, ATVs and SXS. Constructed with Dayco's top cog design for increased flexibility, extra strong aramid cords and fiber-loaded rubber compound, the POWER HPX ATV belt has been proven to run cooler and last longer than competitive belts. These belts deliver the performance and durability demanded by today's smaller, higher output engines and the enthusiasts who drive them.

## **POWER™ XTX™ ATV Belt**

**Developed for higher performing ATV and UTV applications with up to 120HP, moderate performance upgrades and engines up to 800cc.**

Dayco POWER™ XTX™ ATV belts are constructed with specially formulated, high temperature polychloroprene with an aramid fiber reinforcement for increased horsepower capacity and more responsive engine braking during deceleration. This belt is proven reliable at well over 12,000 rpms for faster, more consistent throttle response and improved durability. The Dayco POWER XTX ATV belt's breakthrough design features deeper cogs on top and rounded cogs on the bottom for ultimate flexibility, longer belt life and cooler running temperatures compared to leading competitors.

# DAYCO SNOW BELTS & ACCESSORIES

# DAYCO SNOW BELT LINE

## **POWER™ HP™ Snowmobile Belt**

**Designed for low- to mid-range horsepower snowmobiles with stock engines up to 350cc with no modifications.**

Dayco POWER™ HP™ snowmobile belts are manufactured from a specially formulated fiber reinforced polychloroprene rubber compound and aramid cords to ensure superior strength and dimensional stability for lower horsepower sleds. The POWER HP snowmobile belt provides long lasting belt life in these applications and dependable, smooth performance for leisure, care-free trail riding.

## **POWER™ HPX® Snowmobile Belt**

**Engineered for snowmobiles with mid-to-high horsepower engines between 350cc -600cc with minimal upgrades/modifications.**

Featuring Dayco's top cog design for increased flexibility, extended belt life and reliable service, the POWER™ HPX® snowmobile belt is constructed with aramid cords and a fiber-loaded rubber compound. It's engineered to deliver the increased strength and durability required from snowmobile engines with higher power and RPM. Riders can enjoy the exhilaration of clutching-down with a belt that delivers a full range of power to attack terrain without a loss of horsepower.

## **POWER™ XTX™ Snowmobile Belt**

**Developed for high horsepower snowmobiles up to 120HP with moderate performance upgrades and engines up to 800cc.**

Bred from a rich history of experienced belt builders, the DaycoPOWER™ XTX™ snowmobile belt is engineered to maximize the performance of high horsepower snowmobiles. A specially formulated high temperature polymer – along with engineered reinforcement – proves to perform better in a wider range of belt operating temperatures compared to leading competitors. Its breakthrough design of deeper cogs on top of the belt and rounded cogs on the bottom provide ultimate flexibility and longer belt life. With faster, more consistent throttle response at mid and high speeds, these belts provide an increase in power to the sled's track, more responsive engine braking and are proven reliable at well over 12,000 RPM.

## **POWER™ Racing RPX® Snowmobile Belt**

**Crafted and built for racing snowmobiles used in extreme environments – such as natural or artificially-made tracks consisting of tight turns, banked corners, steep jumps and obstacles.**

The Dayco Racing RPX® belt – provides maximum performance under the most extreme snowcross racing conditions. This belt features precisely pre-formed cogs that enable optimal flexibility, cooler running and extended belt life, along with high twist cords that demand intense strength under extreme tension. Not only is it the belt of choice for many professional and amateur drivers, the Dayco Racing RPX belt is also the strongest aramid belt available on the market today. Its softer specialized polymer compound allows for quicker upshifts and downshifts and the fastest hole shot, helping racers stay ahead of the competition.
